

ELECTRIC VEHICLES: TODAY & TOMORROW

Thursday, August 6th

7:00 PM: REI Downtown

Be kind to our planet: Drive an electric vehicle

From electric bikes, motorcycles, cars and trucks -- an electric vehicle is the best way to reduce your carbon footprint in your daily commute. Join us Thursday, August 6th, at 7:00pm for a talk entitled "Electric Vehicles: Today & Tomorrow" to show what vehicles are available now, as well as what will be available soon as our society moves toward more renewable energy and greener living.

Then, come to REI Austin Downtown (6th & Lamar), on Saturday, August 8th, from 9:00-11:00am, to meet members of the Austin Area Electric Vehicle Association and see their electric cars, trucks, and motorcycles. AustinEV will showcase a few of their vehicles, including a Tesla sports car.
